

Victor Wilmath

717-602-1924 | vww5054@psu.edu | victorwilmath.github.io

Electrical Engineering student with experience in microcontrollers, computer vision, digital signal processing, and web development. Currently seeking relevant internship opportunities.

Education

Pennsylvania State University – Harrisburg

Fall 2023 - Fall 2027

- Bachelor of Science – Electrical Engineering
-

Projects

Synesis

2026

- Developing a Python/ONNX full body tracking system for SteamVR usage via OSC using only a webcam and SteamVR HMD pose data without the use of any physical sensors on the user's body.
- Using ONNX to perform 2D pose estimation through 3D skeleton lifting.
- Integrating OpenVR for HMD anchoring and integrating OSC tracking protocols for use in popular software.

Microcontroller 3D Graphics Rendering

2026

- Developed a framework to render 3D graphics on a Pi Pico W and display it to a TFT display over SPI.
- Using the ILI9341 library, lines of a 3D shape are drawn in a buffer, then pushed to the display all at once.

PSU Harrisburg IEEE Radio Telescope

2025 - Present

- Leading a team of 5 other students on the development and operation of an on-campus radio telescope.
-

Activities

PSU Harrisburg IEEE Student Chapter - Web Administrator

Fall 2025 - Fall 2026

- Officer in PSU Harrisburg's IEEE chapter, oversaw updating the website and hosted web development workshops for the general student body.
-

Technical Qualifications

Languages: Python, C, Rust, C#, HTML, CSS, JavaScript, Verilog, MATLAB, Ada

Software: LtSpice, OrCad Capture CIS, PSpice, KiCad, Unity, Git, GNU Radio, SDR++

Work Experience

Raising Cane's - Cashier | Mechanicsburg, PA

October 2025 - Present

- Manage transactions in a high-volume, fast-paced environment while communicating with other positions.
